

Sarah Resczenko

Senior Counsel

About

Sarah Resczenko brings a dynamic blend of expertise in eDiscovery, transactional law, and data security compliance, with a focus on helping clients navigate issues at the intersection of privacy, intellectual property, and cyber security. As Senior Counsel at Hilgers Graben, Sarah offers strategic legal guidance on leveraging technology for efficiency in electronic discovery, while also advising clients on the legal complexities of emerging technologies, including generative AI (Gen AI).

With a deep understanding of eDiscovery, Sarah develops tailored solutions that optimize workflows, enhance compliance, and reduce costs in complex litigation and diligence matters. Her transactional experience focuses on negotiating and structuring technology agreements, including software, hardware, maintenance, support, and hosting, with particular attention to issues of intellectual property, data privacy, and security, ensuring favorable outcomes for clients in high-stakes technology sourcing and licensing deals.

In addition to these areas, Sarah is a trusted advisor on compliance matters related to emerging technologies, including the development of policies for the ethical and legal use of Gen AI systems. She assists clients in navigating the regulatory landscape surrounding AI, ensuring that their operations remain compliant with evolving regulations and industry best practices.

Sarah is committed to helping clients capitalize on the potential of technology while managing legal and compliance risks, offering forward-thinking advice that aligns with both legal requirements and business objectives.
